

## COVID-19: Graduation of measures in facilities, by alert level

For measures not addressed in this table, please see the relevant ministerial directives.

<b>TABLE D</b>					
<b>Directives applicable to adult IRs where no-one has COVID-19 vulnerability factors, and to supervised apartment IRs, FTRs, IR(Foster Homes) and PSRs in which the operators share their main place of residence with the users, regardless of whether or not anyone has COVID-19 vulnerability factors</b>					
	<b>New Normal</b>		<b>Additional Measures</b>		
<b>Measures</b>	<b>Alert Level 1</b>	<b>Alert Level 2</b>	<b>Alert Level 3</b>	<b>Alert Level 4</b>	<b>Preventive Isolation / Isolation or Outbreak (at least 2 confirmed cases in the facility)</b>
<b>Access to the facility:</b> The number of new informal caregivers or visitors may vary according to the facility's capacity and specific context (number of infected cases or number of employee/replacement absences). Note that the total number of people who may visit the facility at the same time includes informal caregivers, users' visitors and visitors to FTR, IR (Foster Home) or PSR.					
<b>Informal caregivers providing significant assistance or support (see definition<sup>1</sup>)</b>					
Inside the facility, in the room or in a dedicated space	Permitted Maximum of 2 people at once	Permitted Maximum of 2 people at once	Permitted 1 Informal caregiver at once + see the directives for palliative care visits	Permitted 1 Informal caregiver at once + see the directives for palliative care visits	Permitted 1 Informal caregiver at once + see the directives for palliative care visits
Inside the facility, in the common spaces (e.g. lounge, dining room, etc.)	Permitted Maximum of 10 people at once, strongly recommended that the informal caregivers come from no more than 3 households, and two-metre physical distancing must be applied at all times	Permitted Maximum of 10 people at once, strongly recommended that the informal caregivers come from no more than 3 households, and two-metre physical distancing must be applied at all times	Permitted Maximum of 6 people at once, strongly recommended that the informal caregivers come from no more than 2 households, and two-metre physical distancing must be applied at all times	Not permitted Except to walk to and from the room	Not permitted Except to walk to and from the room
Outside the facility	Permitted Maximum of 10 people at once, strongly recommended that the informal caregivers come from no more than 3 households, and two-	Permitted Maximum of 10 people at once, strongly recommended that the informal caregivers come from no more than 3 households, and two-	Permitted Maximum of 6 people at once, strongly recommended that the informal caregivers come from no more than 2 households, and two-	Permitted 1 Informal caregiver at once	Permitted 1 Informal caregiver at once

<sup>1</sup> Informal caregiver: any person who, occasionally or on an ongoing basis, provide assistance to a loved one, family member or not, who is temporarily or permanently disabled, and with whom he or she has emotional ties. The assistance is given informally, in a non-professional way, regardless of age, living environment or the nature of the disability (physical, psychological, psycho-social or other). It may take different forms, e.g. assistance with personal care, emotional support or organization of care.

<b>Others</b>					
The institution's own health and social services professionals (e.g. educators, occupational therapists, nurses, etc.)	Permitted	Permitted	Encourage remote consultation and intervention, otherwise adjust frequency according to needs	Encourage remote consultation and intervention, otherwise essential services only	Encourage remote consultation and intervention, otherwise essential services only
Health and social services professionals from outside the facility (e.g. dentist, hearing aid practitioner, etc.)*	Permitted	Permitted	Permitted Encourage remote consultation and intervention, otherwise adjust frequency to provide essential services	Permitted Encourage remote consultation and intervention, otherwise adjust frequency to provide essential services	Not permitted Except in emergencies and outside the facility

<sup>2</sup> Visitors: any person who wishes to visit the user, who is not a family member and who is not covered by the definition of informal caregiver. It may be someone the user knows and with whom he or she has occasional contacts not essential to his or her physical and psychological well-being. It may also be a person the user does not know. In addition, for visitors from a region that is not at the same alert level as the region in which the facility is located, the directives for the most restrictive alert level apply.

## COVID-19: Graduation of measures in facilities, by alert level

<b>TABLE D</b>					
<b>Directives applicable to adult IRs where no-one has COVID-19 vulnerability factors, and to supervised apartment IRs, FTRs, IR(Foster Homes) and PSRs in which the operators share their main place of residence with the users, regardless of whether or not anyone has COVID-19 vulnerability factors</b>					
<b>Measures</b>	<b>New Normal</b>		<b>Additional Measures</b>		
	<b>Alert Level 1</b>	<b>Alert Level 2</b>	<b>Alert Level 3</b>	<b>Alert Level 4</b>	<b>Preventive Isolation / Isolation or Outbreak (at least 2 confirmed cases in the facility)</b>
				Permitted only in exceptional circumstances to maintain the person's health and well-being: <ul style="list-style-type: none"> <li>- If essential to the user</li> <li>- In a zone with the same alert level</li> <li>- At the home of a significant other (e.g. family, spouse)</li> </ul>	
<b>Personnel/Replacements/Trainees</b>					
Personnel/replacements/ trainees <sup>4</sup> working exclusively in the facility	Recommended	Recommended	Strongly recommended	Strongly recommended	Mandatory
Use of agency personnel <sup>4</sup>	Permitted	Permitted	As a last resort, provided they work exclusively in the facility, and make sure they have received IPC training	As a last resort, provided they work exclusively in the facility, and make sure they have received IPC training	

The health directives applicable to different facilities are based on two main elements:

- The COVID-19 vulnerability factors of the people living in the facility
- The organization of services in the facility (similarity to a family unit, number of different people providing services to users, potential number of visits)

The known vulnerability factors for COVID-19 complications are as follows:

- Age 70 or over
- Compromised immune system (according to the INESSS): [https://www.inesss.qc.ca/fileadmin/doc/INESSS/COVID-19/COVID-19\\_Immunosuppression.pdf](https://www.inesss.qc.ca/fileadmin/doc/INESSS/COVID-19/COVID-19_Immunosuppression.pdf)
- Chronic disease, more specifically an uncontrolled or complex chronic disease that is severe enough to require regular medical monitoring or hospital care (for further details, see page 4 of the INSPQ document on workers with chronic diseases: [https://www.inspq.qc.ca/sites/default/files/publications/2967\\_protection\\_travailleurs\\_sante\\_maladies\\_chroniques.pdf](https://www.inspq.qc.ca/sites/default/files/publications/2967_protection_travailleurs_sante_maladies_chroniques.pdf))
- Significant obesity (e.g. BMI ≥ 40)

<sup>4</sup> Must also be in compliance with other ministerial directives or ministerial orders applicable to human resources.

\*PSR only

\*\* IR-FTR only

#### COVID-19: Graduation of measures in facilities, by alert level

- A medical condition with decreased clearance of respiratory secretions or risk of aspiration (e.g. cognitive disorder, spinal cord injury, convulsive disorder, neuromuscular disease).

For facilities that are both an IR and a PSR or facilities in buildings that also house other services (e.g. an organization offering respite care with accommodation, or a day centre), separate directives may apply to each situation, provided the following conditions are met:

- The PSR places are on a different floor or in a different building from the IR places.
- Employees work in only one of the facilities and do not move from one to the other.
- The common rooms are not used by residents of both the PSR and the IR.
- If the facilities are not separate as shown above, the most stringent directives for infection prevention and control apply.
- The above principles are applicable to all directives that may cover combined facilities. Directives concerning the use of procedural masks or face coverings and the keeping of user arrival/departure registers may also have to be considered.
